**Subject:** Utilities - APS

I want to voice my complaint. Why is it always up to the consumer to have to foot the bill for bad business decisions by the utility companies. They are not broke, they make more money than many companies, they make millions of dollars, they have stream-lined and cut-back their employees so that their profits can be higher. Yet an issue comes up like the shut-down of the power plants and then all of sudden they start talking doubling our utility bills. This is criminal. Whatever happened to the honest price of cost of doing business. They make the errors, they can foot the bill, instead you continually want to pass on bad decisions by a company who has made millions off consumers and let them increase again. This is outrageous. It was bad enough when companies started passing on their taxes to the consumers, ones they used to pay and should be paying themselves. Good Lord, when is this greed ever going to end. Most consumers cannot afford all these increases. If this keeps up we are going to have elderly people who are on fixed incomes dying all over the State from the heat and cold because they can't pay their bills.

This greed has got to stop and as the Arizona Corporation Commission maybe it is time you started looking at what your real job is and that is to protect Arizona consumers, not greedy corporations.

If Palo Verde has problems, that is APS's fault, not the consumers. Do not let them continue to pull this crap, they cannot justify it with the profits they are making at our expense already.

10/18/2005

When we have utility bills that are the cost of a car payment or a house payment, there is something wrong here and it is called major corruption. In fact you should make them roll back their cost and cut everybody's bills in half. When is this greed going to stop.

Arizonans are already being fleeced beyond measure: Footing the bills for millions of illegals. Footing the bill for free healthcare for illegals. Footing the bills for free education for these criminals on top of all these taxes added to all the other bills. Where is all this money going. My mother's phone bill is \$10.00....they added \$13.00 in taxes on to it. Do you think that is right? I would like to personally know where all these tax dollars are going? Companies used to pay many of these things, it was the price of doing business, now consumers are saddled with all this crap and that is what it is crap. We are all being fleeced out of existence as human beings. Shame on this country and its leadership for having no accountability and for fleecing consumers. I have never seen so many taxes in our my life, good lord, it is ridiculous, I'm surprised they don't have a tax on the phone bills, utility bills for - taxes for the kitchen sink. It is outrageous and where is all this money going, I sure don't see it, except for the millions of illegals who are being handed everything and we are being forced to foot the bill and then being forced to line the pockets of private entities like auto insurance companies. Whatever happened to free enterprise. Now we are forced to line the pocketbooks of private entities.

It really makes me wonder who is running this state, who is running this country and what really is going on. I have never seen so much corruption in all my life.

Shame on anyone who steals from pocketbooks to line their own. This is going to be the downfall of this country, corporate greed and illegal immigration (criminals) being given the keys to the country, a country that does not belong to them.

Tell APS to pay their own bills, good lord, they have down-sized so much, it is a wonder if they have enough people to run the nuclear plant.

L. Rott
